Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This application was filed 4/9/2004. Claims 1-33 are before the Examiner.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claim 30 is ambiguous because it is a method of treating claim dependent from a process of making claim 28. Further, there is no antecedent basis for "mammal" in claim 28. Correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Grunenbergs (US Patent #5849752). Grunenbergs teaches a crystalline form of anhydrous

moxifloxacin monohydrochloride. The peaks of the different graphs provided by Grunenberg appear to be the same peaks of the instantly claimed form III. Further, if the instantly claimed form III is different from the form taught by Grunenberg, the pharmaceutical compositions of claims 18-20 and 23 would appear to be the same (inherently) because one pharmaceutical carrier is water. Once a specific crystal is put into water or other appropriate liquid diluent, the specific crystallinity is lost due to the compound/crystal dissolving into the liquid. The process as instantly claimed appears to be fully embraced by the process taught by Grunenberg. Further, for treatment of an appropriate infection, the crystalline form III must no longer be in form III crystalline form to be effective to treat infections. The crystalline form III is absorbed into the body through the blood stream. Once absorbed into the blood stream, the specific crystalline form is lost and the effective ingredient is the moxifloxacin, which is taught by Grunenberg to treat infections.
